

# COURTESY LISTING

## Gretta

Gretta is a purebred Doberman Pinscher who has been well loved and cared for. She is about 5 years old, spayed, healthy, well behaved and has a darling and loving temperament. She is on the smaller size for a doberman and weighs about 65 lbs. She has been well socialized to be around people of all ages, and is good with other dogs. She grew up with a house cat but she would need to be trained not to bother any new cats that she is introduced to. She is very intelligent and trainable and loves to go on walks, or just run and play around the property. For anyone not familiar with this breed, they are super affectionate and bond strongly with their owners. They have high energy when it's walk or play time but they can also be chill when you want to relax on the couch. They are alert and make excellent guard dogs, although Gretta is used to being a house dog so I will not relinquish her to anyone who only wants an outside dog. Gretta just got a wellness check from the vet with a full blood work panel and passed with flying colors. She is up to date on rabies and rattlesnake vaccines. She will make a wonderful companion and addition to your family! If interested, please call or text Holly at 503-802-1626.
