

COURTESY LISTING

MILO AND PEACHES

Milo and Peaches' owner recently passed away. They are presently residing with next of kin.

Milo is a 12 year old male pug. He has some arthritis and deafness and will soon be having some bad teeth extracted. He is otherwise healthy. He sleeps a lot but enjoys short walks on level ground. He prefers not to climb stairs.

Peaches is a 2 year old chihuahua/dachshund female. She is a bit timid at first but warms up quickly. She is playful and fun.

Both dogs have recently had health checkups. They are up to date with shots and are on heart worm preventative. As they are very attached to each other, they need to be placed in a home together. They would be fine to join a home with other dogs or cats, and they are both good with children. Best scenario would be a home where the owner is home most of the time.
