

COURTESY LISTING

Casper

Casper has many positive qualities, among them:

-He is a high energy dog (approximately two years old) and is best suited to a place with some land (large fenced in yard). He loves to go on walks!

-Casper has been wearing a Halti harness on his walks and it is helping.

-In all honesty it appears he has not had a lot of training. He does know the sit command.

-He is good around people and pets. He is not a big territory marker for a male. For a larger dog (70 lbs.) he has a very loving, gregarious personality. He likes to interact with people and loves the attention back.

-He appears to be moderately food motivated which is good for training.

-The main thing that he needs some work on is his tendency to want to jump on people - with some enthusiasm!
