

COURTESY LISTING

2 barn cats

Hi – I have 2 cats that need barn homes immediately as I have more ferals on the way and no more room to house them all.

1 is female she is grey and white 1 year old. Vaccinated and microchipped and flea treated and has been dewormed. She is friendly enough to be handled but needs a barn home.

The 2nd cat that I don't have a picture is getting neutered tomorrow morning he is approximately 5 months old, he showed up at one of my feeding sites. He too will be vaccinated, and flea treated, neutered and dewormed. He is solid grey short haired.

They are ready to get to work on your property for mouse control. They would need 4 weeks to 6 weeks of acclimation period in a kennel or barn, something where they have enough room and can be contained for this period of time to get used to your property. If you are interested in these cats please call me, Rebecca at 916 716-200Eight, you can also text.

Thank you so much. I am in Sacramento and willing to drive the cats to you.
