

LIZZY

Female German Shepherd about a year old

In Search of Better Home

She is spayed and has all her shots.

I have had Lizzy for 4 months & I am her 3rd home. She has calmed and is less anxious but is still distressed when left alone or in new situations. She has very basic training & is kennel trained. She has some socialization with people but less so with other animals except thru fences or doors.

Lizzy loves squeaky toys! Fetch and dribbling her ball! Gardening! And rocks... drooling on, carrying and shoving with her nose!

Lizzy barks at dogs to begin with but settles after getting to know them.

Lizzy needs a home with people who are familiar with shepherds, has time to devote to her training, energy to take her on long walks and hopefully other dogs for her to play with
