

COURTESY LISTING

Luna

Luna is a 6-7year old female, spayed cat. She is a beautiful brindle colored, short haired cat with a bit of white beneath her chin. She is shy, but if there is a lap with her favorite person, she will tentatively approach, hop and snuggle. She also likes to snuggle in bed before she sleeps beside you or beside your feet.

Though Luna has live with a child, she would do better without a child's antics. She has lived with dogs for years, though she has little interaction with them. It's possible that she prefers women. She would love it if her owner were home with her during part of the day so she could have some good lap time, though she can wait until the evening if necessary. When cold, she prefers to stay inside, but when warm she will spend part of her day outside. She has always had a cat door and goes outside to take care of necessities, but she will use a litter box if one is available. She gains weight easily after being spayed.

We are not trying to place Luna because there is something wrong with her. Our home has always been a bit more chaotic than what is best for Luna. She would be so much happier in a slower paced home.
