

COURTESY LISTING

Java

Java is a very sweet, talkative cat. She is about 18 years old and has been with our family since she was a kitten. My mom's husband died in May and my mom has had health struggles for the last few months. During a hospital stay she was diagnosed with lung cancer and is in a rehab facility at the moment but isn't going to be able to return to her home for quite some time because of her medical needs. Java is lonely and stressed and has started to pee inside the house (a neighbor has been feeding her these past few weeks).

My family is unable to adopt her because of severe cat allergies.

It would mean so much to us if she could find a caring home.

Thank you,
