

Here is a picture of Tiwan. She is approximately 6 1/2 years old and spayed. My life condition has changed and I'm on the road for multiple weeks during the year. She has always been a house cat and does not do well being forced to live outside alone in winter or summer. She loves a warm lap to sit in and has a very pleasant disposition. I've taught her how to ask to be picked up by tapping my knee and saying "want a pick me up?" She will talk back when spoken to but is otherwise a quiet girl. Hope you can help me rehome her.

Thanks,
