

COURTESY LISTING:

Harley

Harley is a purebred Doberman pinscher who has been well loved and cared for. He is about 7 years old, spayed, healthy, well behaved and has a kind and loving temperament. He loves to be loved. Harley weighs about 105 lbs. and has been well socialized to be around people of all ages, and is good with other dogs. He grew up with a house cat but he would need to be trained not to bother any new cats that he is introduced to. He is very intelligent and trainable and loves to go on walks, or just run and play around the property.

For anyone not familiar with this breed, they are super affectionate and bond strongly with their owners. They have high energy when it's walk or play time but they can also be chill when you want to relax on the couch. They are alert and make excellent guard dogs, although Harley is used to being a house dog so I will not relinquish him to anyone who only wants an outside dog.

Harley just got a wellness check from the vet with a full blood work panel and passed with flying colors. He is up to date on rabies and rattlesnake vaccines. He will make a wonderful companion and addition to your family!
