

Petition for “Abby”s” new owners

Our Friend-“**Abby**” is a very beautiful cat that appears to be part Bengal and abstract tabby breed. Her coloring is an abstract black and white tabby pattern with some white and amber coloring on her belly--along with some interesting black spotted fur.

She is approximately 5 yrs old now and is still pretty playful.

Abby eats well, with dry food that is always available and two servings a day of wet food.

Abby can be very communicative as well – in her trusting you, she will talk (meow) and almost use her meows as if to answer you. We have found that her tail is also another way she’ll let you know of her mood at that particular moment.

Abby showed up on our property during some inclement weather of winter of 2019. She is very outdoorsy when weather permitting. Abby has adapted very well to being inside and pretty much domesticated-- yet, she needs her outside space as well. Abby is a shy kitty-cat because of her experience and also a bit nervous at times and because of that, she needs, and does well, with much needed

compassionate attention of a loving voice, and a very delicate touch: in order to make sure she has **your trust**. In wanting to pick her up...she won’t last long – Abby likes her space.

When comfortable, Abby loves massages behind her ears, under her jawline, and neck and upper back and has learned she does like a lap sitting too, now and then. Her personality is so very cute and (mentioned before) still very playful!

Other nicknames she responds to are: Here Kiki, Missy, Pretty Girl, and Good Girl!

She knows “hungry, eat, out and come in”. Oh, and she likes to sleep by a warm fireplace or on your bed next to you; when it’s cooler – which at times is very comforting.

Oh, one more thing...She is very photogenic!!

A bittersweet decision, for us, as relocation is in our future and we have to relinquish the commitment of having a pet.
