## Garden/Barn Cat

Beautiful, young tortoiseshell cat seeking a beautiful garden/ back yard. For gardeners that are having trouble with mice I have the solution for you. This young medium haired tortoiseshell female is spayed, vaccinated and flea treated. She comes with her certificate of spay. She would be perfect for that gardener that needs mice control. Cat on duty! (She can be paired with another barn cat) These are cats in need of loving homes. They come from communities where people are not spaying and neutering their pets. Please help us re-home her to a great home with a loving family and good food. If you are interested in her, please call Rebecca 916 716-200Eight. I can transport. Thank you for taking interest in my ad.
